April 2026

Professional Summary

As a highly experienced professional software developer, I've used my combination of computing science degree, I.T. training, and years of progressive industry experience with mission critical, enterprise environments, to deliver solutions that address specific business needs. By specializing in the applications domain, I've gained valuable experience across all aspects of the design, deployment, and operations lifecycle. My soft skills include systematic, methodical problem solving, diplomatic people skills, and clear, logical communication.

Current Technical Skills

- Agile/Scrum
- AI Pair Programming with GitHub CoPilot
- Azure Development
- Azure DevOps
- C#
- Databases: SQL Server, Oracle, Cosmos DB
- Docker Containers
- Frontend: React, Angular, Bootstrap
- Html, JavaScript, CSS
- Microsoft Entity Framework, LINQ
- Microsoft Identity Platform
- .NET
- Node, NPM
- PowerShell and Python scripting
- RESTful API
- Software Design, Software Engineering
- Systems Analysis, Business Analysis
- Test Driven Development, Unit Testing
- Version Control Systems
- Visual Studio, VS Code
- Web Development

Certification

- Microsoft AI Fundamentals (2024)
- Microsoft Azure Fundamentals (2020)
- Microsoft Azure Developer (2021)
- CIPS certified ITCP (2009)
- CIPS certified I.S.P. (1998)
- Microsoft Certified Professional (2006)
- Java Certified Programmer (2001)
- Business Analysis (2026)
- Docker Foundations Professional (2025)
- Python Certified Professional (2025)
- ITIL Foundation (2007)
- Oracle DBA OCP (2004)
- Oracle Developer OCP (2000)

Education

University of Alberta, Bachelor of Science with Specialization in Computing Science, Software Design

Experience (2001 – 2026)

1. DTEK Consulting Services Ltd (2009 – Now)
I.T. Consultant, General Manager, Owner

Clients to Date

EPCOR Utilities, APEGA, AMA, City of Edmonton, GE, Government of Alberta

- Consulting work with each of these clients is detailed in the pages below.
- Alternated between client work, professional development, and internal projects.
- More information: *https://rob-das-win.azurewebsites.net/about*

Internal Projects

Completed all work on the following internal projects.

1.1. Infrastructure Project #2, Systems Analyst (Jan 2025 – Feb 2026)

- Active Directory domain migration and I.T. infrastructure realignment project.
- Tools used: AD DS; DNS Manager; Hyper-V; Linux Mint; Server Manager; WSUS; PowerShell; ChatGPT;
- More information: *https://robidas.github.io/static-site/ad-2025.pdf*

1.2. React Project, Front-End Developer (Jun 2023 – Mar 2024)

- Developed "DTEK Online Store", an eCommerce simulation site, exploring hosting React apps on Azure.
- Tools used: React; HTML/CSS/JavaScript; JSX; Azure App Services; Azure Devops; Docker
- More information: *https://rob-das-win.azurewebsites.net/Documentation/OnlineStore*

1.3. Angular Project, Front-End Developer (Apr 2024 – Dec 2024)

- Redeveloped "DTEK Online Store" as "DTEK Online Shopping", this time with Angular on GitHub pages.
- Tools used: Angular; GitHub Copilot; GitHub hosting; NgRx RxJs; Redux; TypeScript; Karma/Jasmine;
- More information: *https://github.com/robdas1/ng-shopping*

1.4. Azure Project, Full-Stack Developer (Jan 2022 – May 2023)

- Completed the "AzureDev" project, migrating the on-prem corporate website to run in the Azure cloud.
- Modernized the architecture using cloud design patterns including app services, APIs, microservices.
- Secured the cloud app with Microsoft Identity platform using Microsoft Entra ID and Key Vault.
- Tools used: C#.NET; AAD (Entra ID); Azure App Services; Azure Functions; Azure DevOps; APIM; Cosmos DB; Git; JWT; Key Vault; LINQ; Microservices; MSAL.NET; PowerShell; RESTful API; YAML CI/CD Pipeline;
- More information: *https://rob-das-win.azurewebsites.net/html/README.html*

1.5. Certification-Based Research and Study (May 2020 – Dec 2021)

- Professional development: full time student, researcher, author.
- Passed AZ-900, AZ-204 exams to earn the designation "Microsoft Certified Azure Developer" and kept designation up to date by passing the annual renewal exams.
- Wrote my own textbook and published it online at:
  https://robidas.github.io/static-site/Exam-Prep-AZ-204.pdf

Other Accomplishments

- Independent Research and Study (Jan 2018 – Nov 2018)
- Infrastructure Project #1 (Nov 2015 – Jul 2016)
- University Courses (Feb 2012 – Dec 2012)

2. **EPCOR Utilities (Dec 2018 – Apr 2020)**
   Software Developer

- Consulting contract at EPCOR, a Canadian utilities company, working with the CRM team to provide development and operational support to applications including My Accounts, PMDB, and GeoFIT.
- Developed an intranet web-based performance monitoring database application (PMDB) to manage customer service quality in the energy services call center. Linked PMDB to the HR system to get reporting lines used to enforce employee confidentiality and role-based authorization. Created an ETL process to import legacy system data and created an aging mechanism for employee data.
- Upgraded the Customer Engineering Services module of My Accounts web portal and developed a fire hydrant flags component for the GeoFIT asset management application.
- Provided development, testing, and deployment services to other applications as needed.

Tools used: Angular; ASP.NET MVC Core; Azure DevOps; Bootstrap Framework; C#; Entity Framework; Git; HTML/CSS/JavaScript; IIS; Jenkins; Jira; jQuery; LINQ; Node/npm; Octopus; Oracle APEX; PowerShell; React; Serilog & Seq Logging; SQL Server; TOAD; TypeScript; Visual Studio/VS Code; Windows Server

Best practices: agile scrum; code reviews; enterprise architected environment; low code development; object-oriented programming; quarterly release management; requirements analysis; software design; unit testing; version control systems; web portal development

Database: SQL Server; Oracle

3. **DTEK Consulting Services Ltd (Jan 2018 – Nov 2018)**
   Independent Research and Study

- Professional development activities: full-time researcher, systems administrator, software developer.
- Updated the company's corporate network infrastructure, previously created in 2015, to more closely replicate common enterprise environments by using the Hyper-V virtualization framework hosting virtual machines to serve as domain controllers, file, database, TFS, web, batch job, and application servers.
- Redesigned, developed and deployed the company's corporate website to the new network infrastructure using the 2018 versions of .NET Core, Bootstrap, React and Angular.

4. **APEGA (Nov 2016 – Dec 2017)**
   Web Developer

- Consulting contract at APEGA, the Association of Professional Engineers and Geoscientists of Alberta, working with the application development team in the role of senior developer, assisting with the Registration Renewal Competency Based Assessment (CBA) project, for APEGA's self-service center portals.
- Provided guidance on modifying legacy systems by using design patterns and best practices, demonstrating how to refactor disorganized code to be maintainable, and created a suite of unit tests for business logic, allowing developers to hand over high-quality code.
- Produced all project deliverables as per requirements, with many quality improvements to implement separation of concerns, domain service and repository layers, and encapsulation of legacy code with the façade design pattern.
- Delivered high quality, well written, thoroughly tested code for all project deliverables.

Tools used: ASP.NET, MVC.NET and Web Forms; Jira, Confluence, Bitbucket, Bamboo (Atlassian); Bootstrap Framework; C#; HTML/CSS/JavaScript; IIS; jQuery; LINQ; Node/npm; NSubstitute; NUnit; SQL Server; Stored Procs; Version Control Systems; Visual Studio; Windows Server

Best practices: Agile Scrum and Kanban; code reviews; software design patterns; domain driven design; enterprise architected environment; interactive web development; Web portals development; object-oriented software development practices; refactoring; unit testing; cloud-based project management tools

Database: SQL Server

5. **AMA (Aug 2016 – Oct 2016)**
   Web Developer

- Consulting contract at AMA, the Alberta Motor Association, assigned to the Eden project – online driver education admin system replacement.
- Developed a location module to manage all AMA locations organized hierarchically, and present them graphically as a collapsible tree, using Bootstrap Treeview, and created all views based on wireframe mock-ups developed by user experience experts.
- Assisted with development of unit tests and integration tests.
- Took ownership of the first user story "student program selection by location", for delivery into production.

Tools used: ASP.NET Core MVC/Web API; Bootstrap Framework; C#; HTML/CSS/JavaScript; IIS; jQuery; LINQ; NHibernate; Node/npm; NSubstitute; Selenium; SQL Server; TFS; XUnit

Best practices: automated testing; code reviews; enterprise architected environment; intuitive user experience; model-view-controller; object-oriented programming and design; object relational model; repository design pattern; requirements analysis; responsive web design; software design

Database: SQL Server

6. **DTEK Consulting Services Ltd (Nov 2015 – Jul 2016)**
   Infrastructure Project #1

- Internal project: full time web developer, technician, systems administrator, project manager.
- Installed ethernet cabling inside the walls, connecting offices together using secure wired connections.
- Built a business network for corporate admin, software development, and web hosting, using modems, routers, switches, servers, registered domain names, static IP's, port-forwarding, virtual hosting.
- Installed the 2016 version of .NET Core, and used it to host a custom-built company website.

7. **City of Edmonton (Aug 2015 – Oct 2015)**
   Web Developer

- Short-term contract to assist with refactoring of a .NET application.

8. **DTEK Consulting Services Ltd (Jun 2015 – Jul 2015)**
   Documentary Film Maker

- Conducted on-site equipment testing and field research in the Canadian Rocky Mountains.
- More information: *https://youtu.be/slg9j-lzTJc*

9. City of Edmonton (Feb 2013 – May 2015)
Web Developer

- Consulting contract at the City of Edmonton Current Planning, participating in the eServices web portal project to provide online access for citizens to conduct all their business needs with the City of Edmonton.
- Designed and built cross-app functionality: login, reg, and password recovery; corporate branding look-and-feel; remote logging; exception management; user profiles; granular role and permission level security; separate admin site; site navigation; landing page rotating banner; browser plugin detection.
- Assisted QA team to develop test suites in TFS.
- Refactored business logic to follow a layered application architecture.
- Participated in version 2 of the eServices portal: the street vendor business licensing module.

Tools used: Ajax; Angular; .NET; AutoFac DI; Bootstrap; C#; Colorbox; Entity Framework; HTML/CSS/JavaScript; HTTP Handlers; Microsoft Identity; IIS; jQuery; JSON; Kendo UI; LINQ; Log4Net; master/Content Pages; MIME Types & Plugins; Modernizr; MVC & Web Forms; Node/npm; Python; ScrumDo; Security (Login, Roles, Permissions); SourceSafe; SSMS; Stored Procs; Telerik (RadControls & Kendo UI); TFS; Unobtrusive jQuery Validation; User Controls; Web Services; XML Sitemap

Best practices: agile scrum; code reviews; data driven web development; role-based security; dependency injection; object-oriented design; prototyping; requirements analysis; responsive web design; service-oriented architecture; software design; standardized website look-and-feel

Database: SQL Server

10. DTEK Consulting Services Ltd (Feb 2012 – Jan 2013)
University Courses

- Professional development activities: full-time student.
- Took a 3-course sequence from Athabasca University and got straight A's
  - COMP 266 Introduction to web development
  - COMP 348 Network programming
  - COMP 466 Advanced technologies for web-based systems

11. GE (Apr 2011 – Jan 2012)
Software Developer

- Consulting contract at General Electric, Intelligent Platforms.
- Provided software development services for Proficy SOA, GE's manufacturing execution system which implements manufacturing industry standards and best practices.
- Assisted with projects for localization, logout automation, and migration from desktop to browser.

Tools used: .NET; Balsamiq; C#; Confluence; Daemon Tools; IIS; IL Spy; LINQ; NUnit; Python; ReSharper; Silverlight; SQL Server; Subversion SVN; Team City; TFS; Visual Build Pro; Visual Studio; WCF; WPF; XAML

Best practices: agile; build automation; code reviews; continuous integration; MVVM and MVC software design pattern; object/relational data mapping service; object-oriented development; SOA; unit testing

Database: SQL Server

12. Government of Alberta (Sep 2009 – Mar 2011)
Systems Analyst

- Consulting contract at the Govt. of Alberta (GOA), Dept. of Energy, supporting the following applications: corporate accounting & reporting system, quarterly reporting, information letters, oil royalty & tenure web forums, time entry & reporting, contract mgmt. system, contract compiler, freehold mineral tax.
- Assisted in moving the contract management system's Oracle backend to SQL Server.
- Worked on the capacity planning project, migrating applications onto new servers.
- Participated in planned application upgrade releases, system integration testing, disaster recovery planning and testing, documentation of use cases, deployment procedures, migration and disaster recovery plans.

Tools used: ASP.NET; Azman; C#; Crystal Reports; HP Quality Center; HTML/CSS/JavaScript; Ibatis; IIS; Infragistics; Log4net; Microsoft Office; Microsoft Project; Microsoft Access; .Net Remoting; Oracle; SOAP; SharePoint; SSMS; SSRS; Stored Procs & Triggers; T-SQL; Unix

Best practices: code reviews; encryption; enterprise architecture (GAEA); N-tier architecture; object-oriented development; regression testing; source control; test driven development; systems analysis; UML; unit testing

Database: SQL Server; Oracle; Access

13. Sierra Systems, Edmonton (Apr 2001 – Jan 2009)
I.T. Consultant

Clients

- Workers Compensation Board of Alberta (WCB), .NET Developer
- Edmonton Police Service (EPS), Systems Analyst, Police Records Management System

Previous Experience

- Dacro Industries Inc., Dept. of Engineering, Software Developer
- Athabasca University, Computing Services, Systems Analyst
- Government of Alberta, Tax & Revenue Administration, Software Developer (contract via ISL)
- University of Alberta, Dept. of Computing Science, Instructional Systems Analyst

Projects

- "Online Shopping", DTEK (2024)
- "PMDB", EPCOR (2018–2020)
- "Eden Project", AMA (2016)
- "Proficy SOA", GE (2011–2012)
- "CMS Upgrade", GOA (2009–2010)
- "Project PLATO", EPS (2005–2006)
- "AzureDev", DTEK (2022–2023)
- "Registration Renewal", APEGA (2016–2017)
- "eServices", City of Edmonton (2013–2015)
- "Capacity Planning", GOA (2011)
- "LCR New Releases", WCB (2006–2008)
- "Project APSNet", EPS (2004–2005)
